General info

Information on the goods' finishing	<p>Blown glass is the result of an artisanal process. It is a hand-made product that does not involve any industrial or mass production process. Despite the abilities of the artisan, every glass will be different from the other in terms of size, shape and finish. Every glass blown by the "Mastro vetraio" (master of glass) is unique and special. No imperfection, in terms of size, shape and finish, is a defect, but rather the distinguishing feature of a hand-made product.</p>

1. Determine the size of the hole to be made in the plasterboard, depending on the type of formwork.

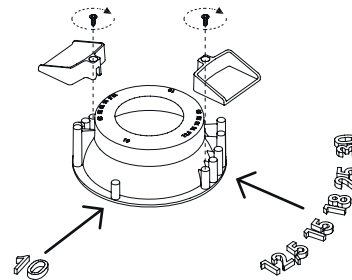

3. Fit the formwork inside the plasterboard and position it over the hole.

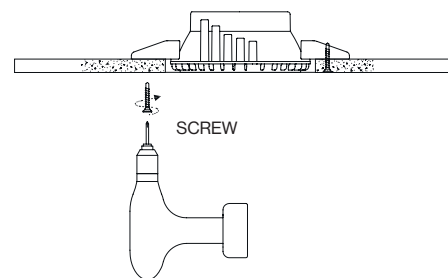

5. Perfectly plaster the edges of the formwork so the ceiling finish is uniform with the inside of the formwork.

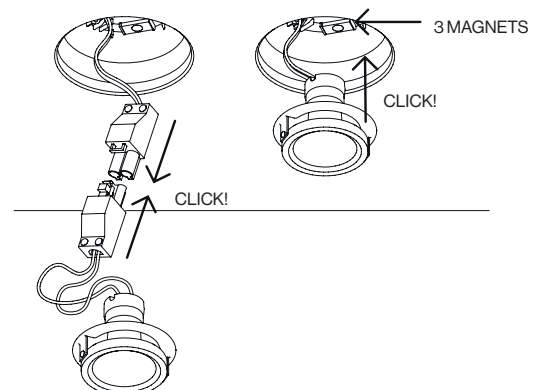

2. The formwork is supplied ready for a plasterboard thickness of 12,5mm. For other thicknesses, move the tabs.

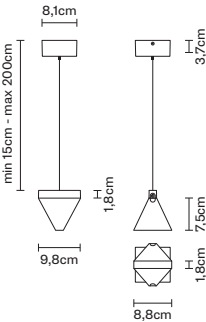

4. Where the tabs are, fasten the formwork to the plasterboard using the screws provided in the pack.

6. In the basic version, fit the light bulb directly on the formwork using the round spring provided in the pack. In other cases, connect the lamp holder with light bulb to the power supply and fasten the whole to the formwork magnets.
