Nella radice classica di Lavai e nella dinamicità del soffiatore sono sintetizzate la forza e la preziosità del vetro soffiato, elemento principe intorno al quale l'azienda, in oltre venticinque anni di attività, ha costruito esempi importanti nella storia contemporanea del vetro veneziano.

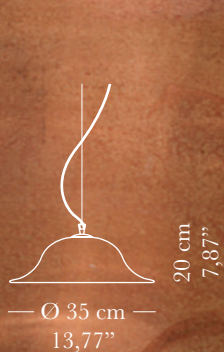

Merito della passione e dell'esperienza del suo titolare Giuliano Statua e del suo folkloristico fratello Walter i quali hanno costantemente ricercato la bellezza e la qualità del progetto attraverso la sperimentazione diretta ed il dialogo con designer e artisti di grande notorietà, con nuovi talenti creativi e con architetti internazionalmente conosciuti.

Figure artistiche, i fratelli Statua, creatori di tecniche innovative e di inediti colori, hanno disegnato oggetti e lampade che le mani e il soffio di sapienti maestri vetrai hanno poi plasmato al fuoco della fornace. La costanza dell'impegno progettuale e produttivo pone oggi Lavai tra le aziende protagoniste nell'evoluzione della vetraria veneziana: nuove risorse creative e finanziarie sono destinate alla ricerca, sia tecnica che formale, e alla salvaguardia delle preziose caratteristiche artigianali che la soffiatura del vetro richiede.

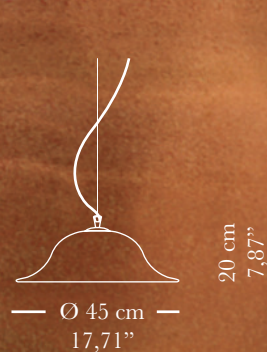

*Renowned glass blowing traditions and skills are the central points on which Lavai has built its reputation in over twenty-five years of activity, enabling it to produce outstanding examples that have left a mark in the history of contemporary Venetian glassmaking. This success is due to the passion and expertise of the company's owner Giuliano Statua and to his resourceful brother Walter, who have always focused on the beauty and quality of a project through research and dialogue with distinguished artists, new creative talents, and world-renowned designers. The brothers Statua are the creators of highly innovative techniques and new colour tones, they have designed objects and lamps that the expert hands and glass-blowing skills of master artisans have turned into exquisite items. The company's constant commitment to producing prime quality has made it now one of the leading names in Venetian glass-making development: creative new talents and consistent financial resources are assigned to research - both technical and formal - and to safeguarding the valued artisan skills and traditions of Venetian glass blowing.*
